

BLIZZARD

Funko Pop! Collection Tracker

Technical Documentation & Source Code Reference

Property	Value
Document type	Full source code documentation + reference
Version	1.0 — June 2026
Author	André Silva — SysAdmin, FPF
Total figures	63
Limited editions	7
Technology	HTML5 · CSS3 · Vanilla JavaScript — no dependencies
Persistence	localStorage (key: bz_owned)
Export format	JSON (version: 1)
Fonts	Cinzel Decorative, Cinzel, Barlow Condensed (Google Fonts)
File structure	Single index.html + imgs/ folder

This document contains the complete source code and technical reference for the Blizzard Funko Pop Collection Tracker. Keep this PDF as a self-contained offline backup — it includes the full HTML source on the last pages.

Table of Contents

1. Architecture Overview
2. File Structure & Image Requirements
3. HTML Structure
4. CSS — Design System & Variables
5. JavaScript — Data Layer
6. JavaScript — Application Logic
7. Export / Import System
8. Limited Edition System
9. Figure Catalogue (63 entries)
10. Adding New Figures — Quick Guide
11. Complete Source Code

1. Architecture Overview

The tracker is a fully self-contained single-page application with no server, no build step, no npm and no framework. Open index.html in any browser and it works — even from a USB stick or local folder.

Layer	Technology	Purpose
Markup	HTML5	Page structure, header, controls, footer
Styles	CSS3 (custom properties)	Blizzard epic theme, card layout, animations
Logic	Vanilla JavaScript (ES6+)	Rendering, filtering, search, owned tracking
Data	JS const arrays inline	All 63 figure definitions inside the HTML file
Persistence	localStorage — key: bz_owned	Owned state survives browser close/refresh
Fonts	Google Fonts CDN	Cinzel Decorative · Cinzel · Barlow Condensed
Images	imgs/ folder (local files)	JPEG/PNG/WebP, displayed at 180px height

2. File Structure & Image Requirements

Directory layout:

```
blizzard-funko-pops/  
■■■ index.html           ← entire app (HTML + CSS + JS, ~52 KB)  
■■■ imgs/                ← all figure images (63 files)  
    ■■■ 14-funko-pop-figure-world-of-warcraft-illidan.jpg  
    ■■■ 14-illidan-black.jpg  
    ■■■ 14-illidan-gold.jpg  
    ■■■ ...  
    ■■■ pack-murloc-3pack.jpg  
    ■■■ pack-durotan-orgrim.jpg  
    ■■■ keychain-murloc-ft.jpg  
    ■■■ kc-diablo-treasure-goblin.jpg
```

Image naming convention:

Images follow the pattern **{number}-{descriptor}.ext**. Multi-packs use the prefix **pack-** and keychains use **kc-** or **keychain-**. When multiple variants share the same Funko number, a suffix distinguishes them (e.g. 14-illidan-black.jpg, 14-illidan-gold.jpg).

Image requirements:

- Format: JPEG, PNG or WebP — all supported natively by browsers
- Recommended size: 700×700 px or larger, square aspect ratio
- Minimum file size: 8 KB (smaller files treated as broken, fallback shown)
- Display: object-fit:contain inside a 180 px tall container — no cropping
- Fallback: missing file → coloured placeholder with number + name shown automatically

3. HTML Structure

Annotated HTML skeleton:

```

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <link href="https://fonts.googleapis.com/css2?..."> ← Google Fonts
  <style> ... all CSS ... </style>
</head>
<body>

  <header>
    <div class="hdr-hex">      ← SVG hex grid watermark (5% opacity)
    <div class="hdr-glow">    ← radial amber glow behind title
    <div class="hdr-vign">    ← left/right side vignette
    <h1>BLIZZARD</h1>        ← Cinzel Decorative, gold gradient text
    <div class="hdr-orn">     ← diamond ornament: line + gems + line
    <div class="stats">       ← Owned / Total / Complete% / Franchises
  </header>

  <div class="controls">
    <input type="text" id="search">    ← live search
    <div id="filters">                ← franchise buttons (built by JS)
    <div class="toolbar">
      <div class="opill" id="ownedCount"> ← green owned counter
      <button class="sync-btn export">    ← downloads JSON
      <button class="sync-btn import">    ← triggers file picker
      <input type="file" id="importFile"> ← hidden file input
      <button class="vbtn" id="gvBtn">■    ← grid view
      <button class="vbtn" id="lvBtn">■    ← list view

  <div id="output">    ← populated by render()

  <footer>
    <p class="ftxt">    ← fan-made disclaimer (English)

  <script> ... data arrays + full JS app ... </script>
</body>
</html>

```

4. CSS — Design System & Variables

4.1 Custom Properties (:root)

```
:root {
  --bg:          #050510;          /* page background — near black */
  --surface:     #0c0c20;          /* card background */
  --surface2:    #101028;          /* stats bar, section labels */
  --gold:        #c8922a;          /* primary accent — Blizzard amber */
  --gold-hi:     #e8b84b;          /* lighter gold highlight */
  --gold-lo:     rgba(200,146,42,0.12); /* gold fill / glow */
  --gold-line:   rgba(200,146,42,0.50); /* ornamental lines */
  --cream:       #f0e6cc;          /* primary text colour */
  --border:      rgba(200,146,42,0.16); /* default card border */
  --border-hi:   rgba(200,146,42,0.46); /* hover/focus border */
  --text:        #c8bca8;          /* body text */
  --text-hi:     #f0e6cc;          /* card names */
  --muted:       #404060;          /* placeholder / disabled */
  --muted2:      #707090;          /* secondary labels */
  --green:       #22c55e;          /* owned state */
  --radius:      10px;             /* card border-radius */
  --card-w:      170px;            /* grid column minimum width */
}
```

4.2 Key CSS Classes

Class / Selector	Element	Description
body::before	Page	Fixed noise grain texture via SVG data-URL
header	Page header	Full-width hero: hex grid + radial glow + vignette
.hdr-hex	Header layer	SVG hex grid at ~5% opacity, fades out vertically
.hdr-glow	Header layer	900px wide radial amber gradient behind title
.hdr-orn	Ornament	line + gem-sm + gem + gem-sm + line divider
.stats	Stats bar	4-col flex: Owned / Total / Complete% / Franchises
.fbtn	Filter button	Transparent, fills with franchise colour when active
.grid	Card grid	auto-fill minmax(170px, 1fr), gap 12px
.grid.lv	List view	Overrides to single-column layout
.card	Figure card	flex-column, 180px img + min 88px body
.card::before	Top line	2px shimmer line, opacity 0→1 on hover
.card::after	Corner	Bottom-right ornament triangle, gold on hover
.card.owned	Owned card	Green border + green ::before shimmer (always on)
.card.limited	LE card	Gold border + animated shimmer (continuous 3s loop)
.cimg	Image area	height:180px, overflow:hidden, flex center
.cimg-bg	Image bg	Radial franchise-tinted gradient (--c-tint)
.wbadge	Wave badge	Top-left overlay, franchise colour background
.obtn	Owned button	Top-right circle, green fill when owned

Class / Selector	Element	Description
.le-badge	LE badge	Bottom-right overlay, gold gradient, 'LE 1,008'
.cbody	Card body	min-height:88px, flex-col: number + name + tags
.slabel	Section label	Flex: line + (gem · TEXT · count) + line
.sync-btn	Sync buttons	Export (gold hover) and Import (cyan hover)
footer .ftxt	Disclaimer	Uppercase Barlow Condensed 11px, --muted colour

4.3 Animations

Name	Applied to	Effect
rise	.card	Fade-in + translateY(15→0), 380ms, per-card stagger delay
shimmer	.card.limited::before	background-position 200%→200%, 3s infinite — gold pulse

5. JavaScript — Data Layer

5.1 Figure object schema

```
// ■■ pops[] – individual figures
{
  num:    "14",           // Funko catalogue number (string)
  name:   "Illidan",      // Display name – variants in parentheses
  wave:   "World of Warcraft", // Franchise – must match a waveColors key
  size:   '3.75"',        // '3.75"' | '6"' | '5.2"' | '10"'
  excl:   "SDCC 2013",    // Exclusivity label – or null
  col:    "#7c3aed",      // Accent hex colour for this figure
  img:    "imgs/14-illidan.jpg", // Path relative to index.html
  limited: true,          // OPTIONAL – enables gold border + LE badge
  qty:    1008,           // OPTIONAL – shown as "LE 1,008" in badge
}

// ■■ packs[] – multi-packs (same structure, no num field)
{ name: "Murloc 3-Pack", wave: "WoW Multi-Pack", excl: "SDCC 2015",
  col: "#22c55e", img: "imgs/pack-murloc-3pack.jpg", limited:true, qty:2016 }

// ■■ keychains[] – Pocket Pop keychains (wave must start with "KC-")
{ name: "Murloc", wave: "KC-WoW", excl: null,
  col: "#22c55e", img: "imgs/keychain-murloc-ft.jpg" }
```

5.2 Franchise colour map (waveColors)

Franchise key	Hex	Colour
World of Warcraft	#7c3aed	Purple
Warcraft (Filme)	#b45309	Amber brown
Diablo	#dc2626	Red
StarCraft	#0891b2	Cyan
Heroes of the Storm	#f59e0b	Amber
WoW Multi-Pack	#22c55e	Green
KC-WoW	#22c55e	Green
KC-Diablo	#dc2626	Red

5.3 Image tints (waveTints)

Each card's image area gets a subtle radial gradient tinted to its franchise colour. Applied via CSS custom property --c-tint on .cimg-bg.

Franchise	Tint value
World of Warcraft	rgba(124,58,237,0.08)
Warcraft (Filme)	rgba(180,83,9,0.08)
Diablo	rgba(220,38,38,0.09)
StarCraft	rgba(8,145,178,0.08)
Heroes of the Storm	rgba(245,158,11,0.08)

Franchise	Tint value
Multi-Pack / KC	rgba(34,197,94,0.07)

6. JavaScript — Application Logic

6.1 Global state

```
let activeWave = "All";    // currently selected franchise filter
let viewMode   = "grid";  // "grid" or "list"

// Set of owned itemKeys — persisted to localStorage
const owned = new Set(JSON.parse(localStorage.getItem("bz_owned") || "[]"));

// Flat array of all items (used for stats count)
const allItems = [...pops, ...packs, ...keychains];
```

6.2 itemKey(d) — unique identifier

Every figure is identified by the string **"num|name"** (e.g. "14|Illidan (Black Shadow)"). This key is stored in the owned Set and exported to JSON. Packs without a number use "pack" as prefix.

```
function itemKey(d) { return (d.num || "pack") + "|" + d.name; }
```

6.3 makeCard(data, delay)

Core render function. Returns a fully constructed DOM element for one figure. Called by render() for every visible item. The delay parameter staggers the CSS rise animation (capped at 300ms to avoid long delays on large grids).

makeCard() — structure it builds:

```
<div class="card [owned] [limited]">           ← animated border, hover glow
  <div class="cimg">
    <div class="cimg-bg">                       ← franchise tinted radial gradient
    
    <div class="phdr">                           ← fallback: number + name
    <div class="wbadge">World of Warcraft        ← franchise label top-left
    <div class="obtn [owned]">✓                 ← owned toggle top-right
    <div class="le-badge">LE 1,008              ← limited edition badge (if limited)
  </div>
  <div class="cbody">
    <div class="cnum">#14                        ← catalogue number
    <div class="cname">Illidan                  ← figure name
    <div class="ctags">
      <span class="stag">3.75"                  ← size tag (amber) or Game Cover tag
      <span class="etag">◆ SDCC 2013            ← exclusivity tag (if excl set)
    </div>
  </div>
</div>
```

6.4 render()

Main render loop — called on every filter/search/view change. Clears #output, determines which sections to show, filters each array, and appends section labels + grids. Animation delays are staggered per item.

render() — logic flow:

```
function render() {
  const q = search input value (lowercase)
  const showPacks   = activeWave === "All" || "Packs"
  const showSingles = not Packs and not Keychains
  const showKC      = activeWave === "All" || "Keychains"

  if (showSingles):
    waves = ["Wow", "Warcraft (Filme)", "Diablo", "StarCraft", "HotS"] or [activeWave]
```

```
    for each wave:
      filter pops where wave matches + name/num contains q
      if any results:
        append mkLabel(wave, colour, count)
        append grid of makeCard() for each figure

    if (showPacks):  append label + grid for packs[]
    if (showKC):     append label + grid for keychains[]

    update countPill + updateStats()
  }
```

6.5 updateStats()

```
function updateStats() {
  const t  = allItems.length;      // total figures
  const n  = owned.size;           // owned count
  const pct = Math.round(n / t * 100); // completion %
  // Updates: #statOwned, #statTotal, #statPct, #totalCount, #ownedCount
}
```

7. Export / Import System

No backend. Owned state is saved in localStorage under key bz_owned. Export/Import allows syncing between devices via a JSON file — no account, no internet, fully offline.

7.1 JSON file format

Example export:

```
{
  "version": 1,
  "exported": "2026-03-31T12:00:00.000Z",
  "owned": [
    "14|Illidan",
    "15|Arthas",
    "990|Sylvanas",
    "990|Sylvanas (Chase — Shadow)"
  ]
}
```

7.2 Cross-device workflow

1. Device A → click Export → downloads blizzard-funko-collection-YYYY-MM-DD.json
2. Transfer file to device B (email / WhatsApp / USB / cloud — any method)
3. Device B → click Import → file picker → select the JSON file
4. Confirm dialog: 'Import N owned items? This will replace current collection.'
5. Green badge confirms: '✓ N imported'

Note: Import replaces (does not merge) the current device's owned state

8. Limited Edition System

Seven figures have confirmed limited production quantities. They receive special visual treatment permanently visible on the card.

8.1 Data flags

Add to any figure object:

```
limited: true,      // enables gold border + animated shimmer + LE badge
qty: 1008,         // shown as "LE 1,008" – omit for generic "LIMITED" badge
```

8.2 Visual treatment

- Gold border: `rgba(232,184,75,0.55)` — always visible regardless of owned state
- Animated shimmer: top 2px gold pulse, 3s infinite loop (background-position animation)
- LE badge: bottom-right corner of image, gold gradient background
- Badge text: 'LE 1,008' (toLocaleString formatted) or 'LIMITED' if qty omitted

8.3 Current limited editions

Figure	Franchise	Qty	Event
Illidan (Black Shadow)	World of Warcraft	1,008	SDCC 2013
Murloc (GITD)	World of Warcraft	300	ECCC 2016
Murloc (Spectral)	World of Warcraft	2,016	SDCC 2016
Murloc 3-Pack	WoW Multi-Pack	2,016	SDCC 2015
Kerrigan — Primal (Metallic)	StarCraft	2,500	SDCC 2014
Demonic Tyrael	Heroes of the Storm	500	SDCC 2015
Angel Imperius	Diablo	5,000	Funko Shop 2025

9. Figure Catalogue

All 63 entries in the data arrays.

10. Adding New Figures — Quick Guide

Open index.html in any text editor. Find the comment `// ■■■■ DATA` near the bottom of the file (inside the `<script>` tag).

Standard figure (add inside `pops[]`):

```
{
  num:    "1234",
  name:   "My New Figure",
  wave:   "World of Warcraft",           // must match a waveColors key
  size:   '3.75"',
  excl:   null,                          // or "GameStop" etc
  col:    "#7c3aed",
  img:    "imgs/1234-my-new-figure.jpg",
  // optional:
  limited: true,
  qty:    2500,
},
```

Multi-pack (add inside `packs[]`):

```
{ name: "My Pack", wave: "WoW Multi-Pack", excl: "SDCC 2026",
  col: "#22c55e", img: "imgs/pack-my-pack.jpg" },
```

Keychain (add inside `keychains[]`, wave must start with 'KC-'):

```
{ name: "My Keychain", wave: "KC-WoW", excl: null,
  col: "#22c55e", img: "imgs/kc-my-keychain.jpg" },
```

Valid franchise keys:

```
"World of Warcraft" "Warcraft (Filme)" "Diablo" "StarCraft"
"Heroes of the Storm" "WoW Multi-Pack" "KC-WoW" "KC-Diablo"
```

```
padding: 80px 24px 58px;
overflow: hidden;
background:
  linear-gradient(180deg, #030310 0%, #07071a 50%, #050510 100%);
}

/* bottom border – double line Blizzard style */
```

Lines 71 – 140 (of 1106 total)

```
header::after {
  content: '';
  position: absolute; bottom: 0; left: 0; right: 0; height: 3px;
  background: linear-gradient(90deg,
    transparent 0%,
    var(--gold) 15%,
    var(--gold-hi) 50%,
    var(--gold) 85%,
    transparent 100%);
  box-shadow: 0 0 14px rgba(200,146,42,0.4);
}

/* hex grid – very subtle, Blizzard watermark feel */
.hdr-hex {
  position: absolute; inset: 0; pointer-events: none;
  background-image: url("data:image/svg+xml,%3Csvg xmlns='http://www.w3.org/2000/svg' width='54' height='94'%3E%3Cpath d='M27 2L52 16v28L27
  background-size: 54px 94px;
  mask-image: radial-gradient(ellipse 90% 100% at 50% 0%, black 10%, transparent 75%);
